# Transforming Power Generation

Case Study

Industry

Power  
Generation

Employees globally

700

BWSC (Burmeister & Wain Scandinavian Contractor A/S) is transforming power generation, transitioning from diesel to renewable energy sources like wood chip, straw and, most recently, hydrogen power. With 700 employees across 16 sites worldwide, BWSC

manages complex operations from the UK to Africa and Japan. As BWSC grows, so does the need to keep health, safety and operational standards high. To meet these goals, BWSC turned to Evtix.

# Day-to-Day Challenges

BWSC's previous system made it difficult to keep up with the demands of their complex, fast-paced operations. Lacking real-time insights, teams often had to estimate what was happening on-site and rely on cumbersome, manual processes.

Main challenges included:

## Limited Availability

Reporting required laptops, limiting on-the-go updates and slowing down communication.

## Data Inconsistency

Without standard processes, incident records were often incomplete and hard to track, reducing the possibility to pinpoint root causes.

## Time-Intensive Reports

Monthly health and safety reports took up to 2.5 days to generate, reducing time for analysis and action.

## Lack of Transparency

Meeting clients' need for accurate, detailed safety data was a challenge without centralized reporting.

BWSC's leadership formed a focus group to evaluate potential systems based on user-friendliness, reporting features and standardized incident investigation processes. After reviewing 12 systems, they found Evotix met their extensive needs best.

# Implementation and Early Wins

Evotix's implementation at BWSC was fast and effective, exceeding expectations and setting a new standard for project success.

I've done a lot of IT projects in my time, and I thought it was absolutely among the top performances that I've seen from a software vendor towards the client.

QHSE Specialist

## UK Focus First

Representing 75% of BWSC's operations, UK sites were the first to go live with Evotix.

## Taking Action

Incident Reporting and Safety Observations were prioritized to address immediate data needs.

Initially anticipating a three-month transition, QHSE Manager, Craig Critchley, reported,

After just a month, nobody was using paper-based systems anymore.

## Global Expansion

The UK rollout was so successful that BWSC quickly decided to expand Evotix globally, confident in the system's usability and effectiveness.

## Outstanding Support

BWSC was impressed by Evotix's fast, proactive support. "When submitting a request, you'd expect it might take 48 hours, but they're on it straight away. Everything has been absolutely outstanding," Critchley noted.

Throughout every single stage of this process – from the initial contact, to sales, implementation and aftercare – it's very customer-driven and customer-focused. I always feel that Evotix works around what we want to do rather than we work around Evotix,

added Critchley.

## Empowered Users

Evotix trained BWSC's team to create and adjust their own templates and forms, allowing them to adapt quickly without added costs.

# Outcomes

With Evotix, BWSC has transformed how it manages health and safety. By moving to a streamlined, data-driven platform, BWSC now spends less time compiling reports and more time proactively improving safety across all sites.

Key outcomes include:

## Significant Time Savings

Monthly health and safety report times have dropped from 2.5 days to just one hour, freeing up teams to analyze trends and act on insights rather than on paperwork.

## Improved Data Accuracy

BWSC teams now trust the data they're seeing, understand it and use it to drive safety initiatives.

## Targeted Safety Campaigns

Greater visibility into common hazards like slips and trips allows BWSC to launch proactive campaigns, helping reduce risks before incidents happen.

## Positive Feedback Across Teams

BWSC's teams appreciate Evotix's accessibility and ease of use. Several sites have even recommended Evotix to clients, impressed by its impact and comprehensive data.

## A Data-Driven, Proactive Future

With Evotix, BWSC's leadership is more engaged than ever in health and safety.

Before, we didn't have the confidence to challenge because we weren't sure if what we were saying was true, shared Critchley.

"Now, everyone feels confident because we actually have measurable, factual data."

Looking forward, BWSC is committed to lowering injury rates and building trust across clients and employees. With Evotix, BWSC is equipped to face future safety challenges and continue evolving as an industry leader.

As Melchior put it,

We look forward to many years of working with Evotix.
