Asset Management

Ensure Equipment Is Available and Safe To Use

Improperly managed equipment, like machinery or PPE (Personal Protective Equipment), can pose a risk to employee safety and business operations. Often widely dispersed and used by multiple employees and contractors, it can be challenging for organisations to maintain full visibility of maintenance and testing requirements.

Evotix gives you greater visibility and control over your assets and regulatory checks. Track the location and condition of every piece of equipment, to easily identify defects, and make sure maintenance and repairs are completed as needed.

Promote a proactive approach to asset maintenance across your entire organisation by making it easy to identify and track issues early.

Expected Outcomes

Visibility
Ensure every piece of equipment is captured and registration, maintenance, testing and compliance information is documented.

Compliance and Safety
Provide a full audit trail of statutory testing and maintenance checks.

Consistency
Formalise maintenance and inspection processes across your entire organisation.

Accountability
Delegate and track follow-up actions to completion. Ensure inspections are performed to the required standards.

How Does It Work?

01

Keep track of your equipment
Record and track your assets in one place to ensure they are maintained and safe to use. Document any equipment, like PPE, that is issued to your people to ensure they have received it, it is fit for purpose and safe to use.

02

Ensure equipment is safe to use
Provide your teams with mobile tools to complete pre-use inspections and identify any issues to be rectified immediately.

03

Stay ahead of your maintenance requirements
Capture, manage and report on critical elements of the investigation such as root cause and corrective actions.

04

Track statutory maintenance obligations
Capture and stay ahead of required maintenance and checks such as portable and fixed wiring, emergency lighting, legionella, etc.

05

Ensure defects are taken care of quickly
Introduce clear processes for reporting defect and unplanned maintenance. Automated workflows ensure that the right people are informed and can act immediately.

Proactively Manage Safety with Evotix

Our EHS software comes with a suite of standard features that support effective health and safety management. Start by engaging your people with easy safety tools and creating a flow of information by capturing data on the mobile web app.

This triggers notifications to prompt next steps and ensures that any required actions are closed out efficiently and effectively.

All activities can be visualised and analysed in easy-to-use, configurable dashboards. This enables organizations to make the right strategic decisions to drive continuous improvement.

What's Included?

✓ **Equipment Register**
Log and keep track of assets and equipment across your organisation.

✓ **Mobile Reporting**
Complete your inspections and maintenance forms on mobile or tablet in the field for immediate data entry and follow up.

✓ **QR Code Scanning**
Scan equipment QR codes on mobile to ensure the right equipment details are completed on the form.

✓ **Form Builder**
Create innumerable maintenance and inspection forms and share across your teams for consistency.

✓ **Action Tracking**
Track actions and their status to close-out. Automate reviews and inspection reminders to ensure no due dates are missed.

✓ **Insights and Reporting Tools**
Easily share an overview of your equipment and inspection status with other stakeholders. Spot trends to identify areas for improvement across your teams.
