Incident Management

Report Incidents, Gather Insights, Improve Performance

One of the common challenges within health and safety is the underreporting of wanted and unwanted events across organisations.

In many cases, the lack of consistent and complete data makes it difficult to proactively identify the right areas that need attention.

By collecting data on all incidents and accidents you can ensure that investigations get completed, preventative and corrective actions are implemented and other strategies identified so that the risk of reoccurrence can be reduced.

Evotix equips you with all the tools to easily and effectively manage your incidents in one system, starting with user-friendly reporting on a mobile safety app. Easily complete investigations, report to authorities and analyse trends.

Expected Outcomes

Track Progress
Simple tools improve engagement and encourage everyone to report the things they see.

Better Visibility and Accountability
Automated workflows and action management ensure incidents are effectively investigated and resolved.

Easily Understand and Analyse your Performance
Quickly visualise data in dashboards to understand trends.

Save Time and Change Focus
Automated reporting for all stakeholders frees up time for more proactive activities and makes demonstration of compliance simple.

How Does It Work?

01

Report easily using mobile
Capture more incident data with an easy-to-use mobile app. Anyone can report events and incidents in forms that reflect your terminology and processes.

02

Manage incident follow-up
Notify key people prompting immediate response to initiate of your incident management protocol.

03

Complete investigations
Capture, manage and report on critical elements of the investigation such as root cause and corrective actions.

04

Report to regulatory authorities
Collate the information required by external bodies with ease.

05

Improve
Understand your data. Evaluate performance against KPIs in interactive dashboards and identify how to prevent reoccurrence and opportunities for improvement.

Proactively Manage Safety with Evotix

Our EHS software comes with a suite of standard features that support effective health and safety management. Start by engaging your people with easy safety tools and creating a flow of information by capturing data on the mobile web app.

This triggers notifications to prompt next steps and ensures that any required actions are closed out efficiently and effectively.

All activities can be visualised and analysed in easy-to-use, configurable dashboards. This enables organisations to make the right strategic decisions to drive continuous improvement.

What's Included?

✓ **Incident Records**
Notify key people prompting immediate response and initiation of your incident management protocol.

✓ **Vehicle Incident Records**
Separate and understand any vehicle related incidents.

✓ **Vehicle Register**
Maintain a vehicle register including service and MOT alerts, allowing you to link specific vehicles to incident records, understanding costs and trends.
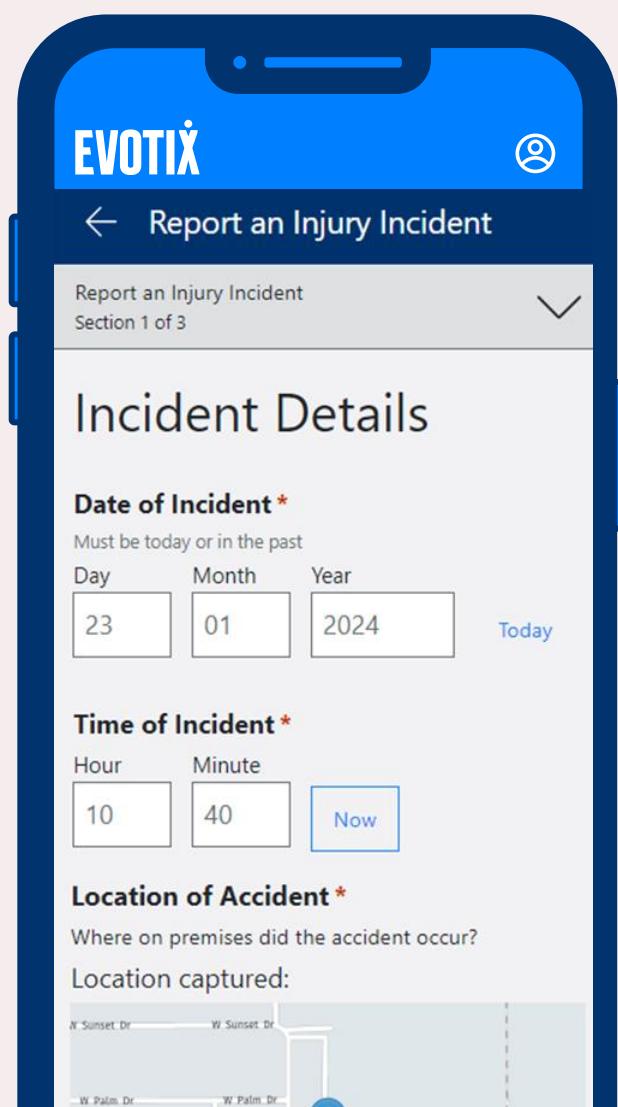

✓ **Claims Administration**
Link your incident records to claims, administer the status and assess costs of the claims.

✓ **Incident Investigation**
Configure your investigation method, using chosen methodologies including 5 Whys/Root Cause Analysis. Easily understand and share your findings.

✓ **Incident Reporting**
Create and submit incident reports to regulatory bodies.

✓ **Incident Analysis**
Calculate incident frequency rates.
