

Factsheet

Risk Management

Identify, Control & Reduce Risk

Every organisation faces risks – managing risk proactively is a critical part of any successful business.

As a health and safety professional, you know this well. You also know that while you cannot eliminate all risks; it is important to embed hazard awareness and risk management into your organisation's DNA.

By being proactive, and implementing preventative processes and tools, we can minimise the adverse effects that can lead to loss and ensure the workplace stays healthy and safe.

We often find that when a hazard has been recognised, or the need to create a risk assessment has arisen, the process can be inefficient.

By streamlining these across your organisation, you can simplify how your team identifies hazards and assess risks therefore increasing employee engagement with health and safety.

Expected Outcomes

Drive Best-Practice

Promote a consistent approach to managing risk across your organisation so you can easily identify and drive improvements.

Simple to Use

Make it easy for more people to complete activities with simple to use forms on mobile, define automated workflows so tasks can be assigned and closed out by others in the organisation.

Improved Hazard Awareness

Ensure your workforce is aware of and implementing steps to reduce hazards.

Ensure Compliance

Demonstrate effective management processes are in place to support regulatory requirements and best practices.

How Does It Work?

01

Reporting on the EHS mobile app

Get everyone to complete activities at point of work.

02

Identify and document hazards

Add supporting documents through attachments.

03

Configure forms

Create tailored inspections and assessments to suit your needs. Refine pre-configured templates, or create your own using our intelligent template builder iQ.

04

Automate action, approvals and reviews

Ensure assessments are suitable, sufficient and stay relevant. Assign actions to other users to complete.

05

Share

Publish completed reports, incl. risk assessments with your teams via mobile tools.

06

Understand trends

Interactive dashboards help understand your performance, track KPIs and identify priority areas.

Proactively Manage Safety with Evotix

Our EHS software comes with a suite of standard features that support effective health and safety management. Start by engaging your people with easy safety tools and creating a flow of information by capturing data on the mobile web app.

This triggers notifications to prompt next steps and ensures that any required actions are closed out efficiently and effectively.

All activities can be visualised and analysed in easy-to-use, configurable dashboards. This enables organisations to make the right strategic decisions to drive continuous improvement.

What's Included?

Hazard Spotting

Easily record hazards on a mobile app and ensure they are controlled.

Project Risk Assessment

Manage all assessments for your project in one place.

Safe Systems of Work (SSOW) / Standard Operating Procedures (SOPs)

Document detailed control measures for high-risk activities and link to risk assessments.

Activity Risk Assessment

Complete assessments on all critical tasks and activities. Identify hazard and suitable control measures.

Other Assessments

Create and manage your bespoke assessments in one place.

Choose from pre-configured templates:

- DSE Assessments
- Manual Handling Assessment
- Fire Assessments
- Noise Assessment
- Substance Activity Assessments (COSHH, DSEAR. Store & share GHS SDS documents)

The image shows a smartphone screen displaying the EVOTIX app interface. The app is titled 'EVOTIX' at the top. Below the title is a purple header bar with the text 'Hazards And Controls'. The main content area is white and contains three sections: 1. 'Hazard Category *' with a dropdown menu showing 'Manual Handling'. 2. 'Hazard Phrases *' with a text input field containing 'Lifting heavy objects or awkward loads' and 'Injury due to lifting heavy objects or awkward loads'. Below the input field is a link 'Select from list'. 3. 'Persons At Risk' with a text input field containing 'Operator'. The text length for both input fields is noted as 'between 0 and 100000 characters'.

If you need EHS technology solutions or metrics management for ESG reporting, **we can help.**
