Customer since

2019

CAF Rail is a multinational group with over 100 years of experience in the supply of comprehensive transit solutions.

The company is a leader of the railway industry, offering one of the most comprehensive and flexible arrays of products in railway related markets, such as rolling stock, components, infrastructure, signalling and services.

# Health and Safety Are Key at CAF Rail

The organization has a central HSQE team as well as Safety Committee Teams across the business, to ensure everyone is engaged in health and safety processes and practices.

## CAF Rail's Health and Safety Goal:

CAF Rail identified the need for a centralized system to provide visibility of health and safety performance across the entire company in order to locate opportunities for improvement. CAF Rail wanted to move away from folder structures and streamline processes across all 15 UK sites.

## The Challenge

### Lack of Visibility

Many CAF projects have multiple sites across multiple regions, making it tough to maintain complete visibility and understand the progress being made by each site.

We now have the tools to support our continued growth within the UK, but more importantly, deliver a healthier, safer and more compliant workplace.

**James Harris**  
HSQE Manager

Without that full understanding, it was difficult for the HSQE team to set KPIs, monitor improvements and report progress back to management.

It is also important to CAF's mission to demonstrate compliance with ISO standards for accreditation.

## Health and Safety Processes Prior to Evotix:

**01** Reporting through emails, phone calls, Word documents, paper and pen to report accidents.

**02** Actions managed through emails and in spreadsheets.

**03** Frequent loss of traceability.

# Health and Safety Transformation With Evotix

To tackle its most pressing health and safety challenges, CAF is using Evotix technologies to manage incident, risk, audit, contractors and environmental tracking.

The implementation of Evotix across CAF Rail UK has been effortless.

## The Journey With Evotix

On the way to making a positive difference

Evotix implemented its flexible health and safety software solution to support CAF in the collection, understanding and reporting of health and safety data.

01

CAF identifies Evotix as an intuitive and easy-to-use, mobile-first solution.

02

CAF engages and empowers its workforce to realize a higher standard of workplace safety.

03

Every employee at CAF has easy access to report hazards and incidents.

04

Management at CAF can easily conduct audits and risk assessments on the go.

Sharing CAF's passion for improvement, Evotix works closely to understand top priorities and plan technology rollout, delivering value as soon as possible.

# The Outcome

Evotix has helped the HSQE team embed health and safety in the business

01

Employee engagement has increased significantly, as near misses and incidents can now be reported on the mobile app in real time.

02

Evotix has given the HSQE team full visibility of health and safety performance across all sites and projects.

03

Managers and key technicians have increased visibility of their departmental performance.

04

Decision-makers are easily able to identify trends, track leading indicators and help understand where proactive interventions will be most effective.

## Evotix: The Gift of Time

01

The HSQE team is now able to spend more time interacting with operational teams and less time focusing on administrative duties.

02

Before Evotix, a risk assessment or an audit would take up to two days to complete, which has been drastically reduced to a few hours.

03

Evotix has made recording an audit or risk assessment on the go a reality, reducing admin time drastically.

# Accreditations Are Achieved With Evotix

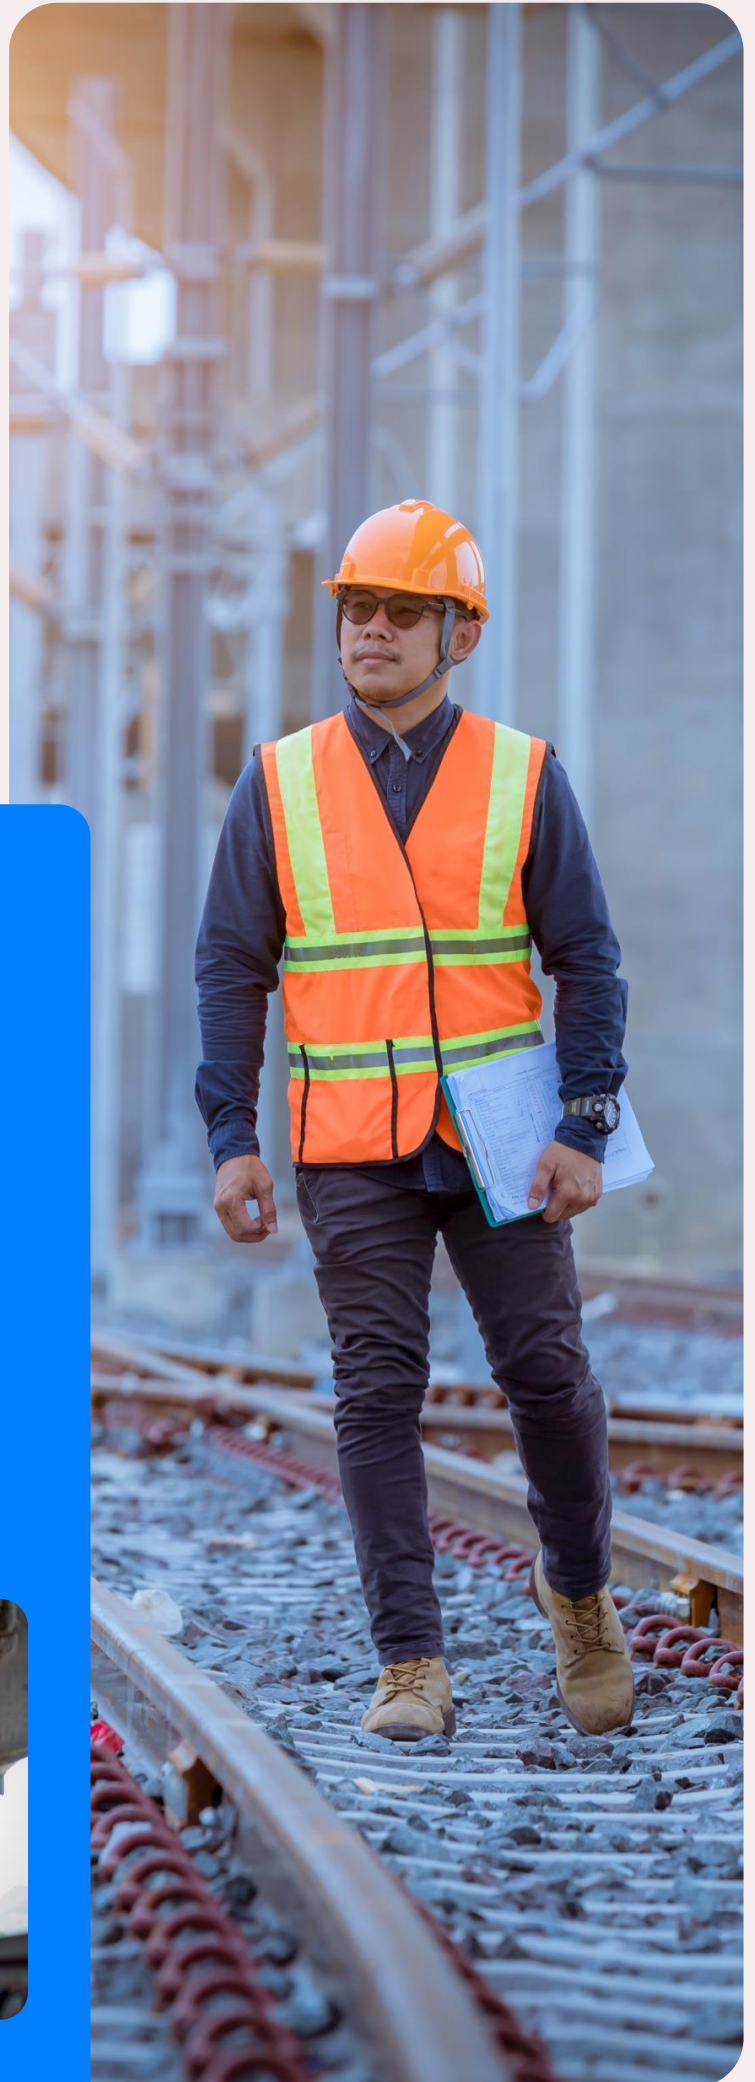

Since partnering with Evotix, CAF Rail has achieved ISO accreditation 14001 and 45001, has become RISAS approved and is now recognized as best-in-class at delivering the most challenging and high-risk products and services to the rail industry.

With Evotix's centralized management system in place, CAF Rail has been able to demonstrate its commitment to staff, clients, auditors, regulators and industry bodies that they meet and exceed industry and ISO standards.

We have developed a great partnership with Evotix and look forward to seeing the continued benefits across our wider workforce.

The team at Evotix supported us through the full implementation process.
